Mr. Nelson discussed the CEO search and the efforts of the search firm as well as the athlete involvement. There are a few candidates that are finalists. The decision will most likely be announced by the end of September. Ms. Randall mentioned that the athletes appreciated their involvement.

On the financial front, we have increased expenses due to the pandemic and the OWG preparations, but we have continued to balance our budget and we have received support from our Trustees. Mr. Nelson thanked the staff, athletes, board, and trustees for all their resilience.

We’ve managed to continue to train and prepare for the season. We are on a modified work location based on the increased rates of Covid.

Travel restrictions will continue to impact our athletes and team travels this year because the U.S. is considered a high transmission area again. We will have many on our teams with Swiss and Austria visas to assist our athletes in training in the EU this fall because we cannot go to the southern hemisphere. Additionally, the pandemic is impacting other international athletes coming to the U.S. to compete. The USOPC is assisting but there will be delays and impacts.

Regarding the Olympics, we are watching the media on the boycotts. We have a team dedicated to planning for Beijing and the additional challenges that the pandemic will have on travel restrictions and protocols. There may be added costs with the protocols. Ms. McAffee provided the forecast for the marketing revenue and Mr. O’Conor provided additional details regarding the sponsorship, partnership, and licensing deals. There are not many partner renewals this year because it’s an Olympic year and most partnership are written to go through the OWG.

There was discussion among the Board regarding global supply chain delays that will be impacting the ski industry including gear and apparel. Additionally, there are increased shipping costs and delays. All of this means that there will be increased costs to consumers, and it is expected that this will take 2-3 years to correct the supply chain.
